

Dear valued patients,

As healthcare professionals, there is nothing more important to us than the well-being our of patients, staff and community. We are experiencing an unprecedented chain of events in our country (COVID-19). Our high level of universal precautions and sterilization has not changed but we are taking extra precautions for everyone's safety.

We remain open to assist our patients who require necessary restorative and emergency care. If your child is having a true dental emergency or is in need of restorative treatment please call our office to schedule or confirm your appointment. If we are not available to answer your call directly please leave a message as we will be checking our voicemail routinely.

If your child is scheduled for routine care between now and March 31st, we will be calling to reschedule your appointment. If your child is scheduled for restorative, extractions or emergency care your appointment is still valid.

This decision was not made lightly, but is in line with the most current recommendations from the Department of Health and the American Dental Association. Reducing the impact of the virus is a community effort. By taking these proactive steps, we aim to ensure we are doing our part in protecting the health and safety of everyone in our community.

For more information, please visit <https://www.doh.wa.gov/Emergencies/Coronavirus>

We truly appreciate your support during this challenging time, please know that we are here for you.

Dr. Stephanie Su, Dr. Purva Merchant, and your team at Redmond Kids' Dentistry
